2015/7/14 林涛

今天又查了一下 ,Hossein Falaki 的那个项目是 databricks 的产品线的一部分: https://databricks.com/product/databricks

这种 notebook 的思路似乎已经在数据科学领域风行起来了, zeppelin 是开源社区在做的, 而这个是 databricks 在做的。

有篇 2014 年底的报道:

IBM, Databricks, GraphLab Present Notebooks as Unified Interfaces for Building Prediction Apps

http://www.infoq.com/news/2014/12/ipython-notebooks

Using an IPython-style web-based notebook interface, users can search for data sets, extract data, and build visualizations that are embedded in the document in real-time.
